

# MICHELE PULVIRENTI

## DEVELOPER

<https://mikecheek.github.io/portfolio>

### ABOUT ME

Having been fascinated with computers since I was a child,  
I am studying computer engineering at the Polytechnic of Turin.  
I am currently working at JEToP, a student non-profit organization.  
In my first year, I decided to work there because I wanted to immediately take advantage of the opportunities that the university offered  
In my spare time, I like to draw, both on paper and digitally, and I also do acrobatic gymnastics

### PROJECTS

Pop! Funding (<https://pop-funding.vercel.app>)  
-> [GitHub Repo](#) (on my profile)  
-> Developed and designed by me (frontend)  
-> Crowdfunding platform based on Algorand Blockchain. Developed as a final Project Work at the end of the MasterZ Blockchain course

Naturalmente Tecnologici (<https://nt.syskrack.org>)  
-> [GitHub Repo](#) (on my profile)  
-> Developed by me  
-> Website created on the occasion of the Naturalmente Tecnologici event organized by the Syskrack association in Grassano (Matera)

### SKILLS

Programming languages:  
JavaScript, C, Java, Assembly MIPS, PHP, Bash (Unix)

Framework:  
ReactJs, GatsbyJs, NextJs

Other:  
HTML, CSS, SQL, Linux, Matlab, Simulink

Languages:  
Italian (mother tongue),  
English (B2, Cambridge First Certificate)

### WORK EXPERIENCES

JEToP - Junior Enterprise of Politecnico di Torino  
-> From October 2019 to today  
-> Roles: IT Consultant, Collaborator of IT Area  
-> As a member of teams on both internal and external projects, I have increased my knowledge of web programming by developing websites with frameworks like ReactJs, GatsbyJs and NextJs and have improved my backend skills through training.

For example, I developed the Blog section of the association's website (<https://jetop.com/blog>) and Web Dev Challenge landing page (<https://wdc.jetop.com>)

### OTHER EXPERIENCES

JEISM - JE Italy Summer Meeting (2021)  
-> Event between Italian Junior Enterprises  
-> Location: Gabicce, Marche  
-> Duration: 3 days  
-> The event provided an excellent opportunity for discussion with guys from different Junior Enterprises, as well as getting to know the partner companies of the event through daily workshops.  
A stimulating workshop was organized by Open Marketplace on the theme of Open Innovation

SysE2021 - Summer School (2021)  
-> Master's degree orientation event organized by the University of Genova in collaboration with the University of Savoie Mont Blanc and carried out in English  
-> Location: Imperia, Liguria  
-> Duration: 5 days  
-> Thanks to the Hackathon held during the event, I gained experience with scientific calculation languages such as Matlab and Simulink
